GitHub LinkedIn LeetCode HackerRank Portfolio

Objective

Computer Science graduate with hands-on experience in React development, browser automation, and Chrome extension engineering. Skilled in building responsive interfaces, reusable components, and multi-step workflows using JavaScript, React.js, and Tailwind CSS. Seeking a software development role to contribute to reliable, user-focused applications.

Skills

- **Programming Languages:** Java, JavaScript, SQL
- **Frontend:** HTML5, CSS3, React.js, React Router, Tailwind CSS
- **Browser Technologies:** Chrome Extension APIs, localStorage, Browser Automation
- **Database:** MySQL
- **Tools & Deployment:** Git, GitHub, Vite, VS Code, Vercel
- **Core Concepts::** Responsive Web Design, Component-Based Development, State Management, Form Validation

Experience

SuperCommands — Software Developer Intern

May 2026 – Present

- Develop responsive React interfaces and browser automation features for a productivity platform.
- Integrate Chrome storage, runtime messaging, tabs, and background service workers to coordinate communication between React interfaces and browser processes.
- Build reusable React components that enable users to configure and run automated browser workflows.
- Collaborate with developers and product stakeholders to refine requirements, review code, and deliver updates through GitHub workflows.

Projects

Career Nexus | [GitHub]

- Developed role-based React dashboards for students, Training and Placement Officers, and recruiters to support their respective placement workflows.
- Built reusable UI components and responsive Tailwind CSS layouts to maintain consistent interface patterns across dashboards.

Auto Auth | [GitHub]

- Developed React components for healthcare authorization forms with automated data prefill and real-time validation to reduce repetitive manual entry.
- Managed form state across multi-step workflows, incorporating error handling, loading indicators, and submission feedback to guide users through form completion.

Burger Hut | [GitHub]

- Developed a responsive food-ordering frontend with menu browsing and persistent cart state using React.js and localStorage.
- Implemented client-side navigation between menu and cart views with React Router and configured GitHub-based continuous deployment on Vercel.

Education

Pragati Engineering College	2022-2026
Bachelor of Technology in Computer Science and Engineering	7.88 CGPA
Narayana Junior College	2020-2022
Intermediate	79%
Vivekananda Public School	2020
10th	94%

Certifications

- Java Certification — Infosys
- Salesforce Certified AI Associate — Salesforce
- SQL (Intermediate) Certificate — HackerRank
